PROFILE

I am a disciplined and consistent individual with strong leadership skills, passionate about frontend development and machine learning. I aim to apply my skills to solve real-world problems and deliver impactful results.

EXPERIENCE

Cognifyz Technologies JULY 2025 - PRESENT
-Machine learning Intern
Opportunity to work on real-world datasets, including data collection, cleaning, and analysis to extract insights, while assisting in building and deploying machine learning models.

PROJECTS

Fitness Tracker Application MAR 2025 - MAY 2025

- Built a calorie tracking app with food image scanning, AI-based calorie estimation via Gemini API, and a chatbot for diet insights.
- Role : Flutter Developer
- Tech stack : Flutter, Dart, Firebase, Gemini API

AI Resume Analyser JAN 2025 - FEB 2025

- Built an AI-powered resume analyzer with seamless authentication, smart job matching, and personalized ATS-based feedback.
- Role : Frontend Developer
- Tech stack : React, TailwindCSS, TypeScript, Puter.js

DSA Visualization Website SEPT 2024 - OCT 2024

- Built an interactive website to visually demonstrate data structures with animations for better conceptual understanding.
- Role : Frontend Developer
- Tech stack : HTML , CSS , JavaScript
